## **DETAILED ACTION**

Applicant has canceled all previous claims (1-156 and 182-200) and has introduce new claims (157-181 and 201-213).

### ***Claim Rejections - 35 USC § 101***

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 157-181 and 201-213 are rejected under 35 U.S.C. 101 because the disclosed invention is inoperative and therefore lacks patentable utility. The claims are directed to measuring risk using quantifying risks which includes such elements as brand, customer relationship, employee relationship, alliance, etc which are not quantifiable. How a brand is quantified? For example, who knew that GE brand will do better business than another company, or Google stocks will shoot to \$300. How these are quantified? Similarly, employee relation, alliance, etc. Is the quantifying these value are repeatable? If so how, how an ordinary skill in the art can use this invention and repeat the process and come to similar conclusion.

Provide examples of calculations. It is known that the companies are valued during merger and acquisitions which are just apprised.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 157-181 and 201-213 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Applicant's specification does not explain:

How to measure plurality of risks?

identifying one or more risk management activities based upon said risks and calculating an amount of capital available for said risk management activities using at least a portion of said data.

How optimization is done?

How market value is computed?

Where in specification quantifying risk under scenarios .. is explained? What is normal and extreme scenario? Is it simply arbitrary assumption of historical risk verse an impact of unforeseen event? How it is quantified?

Where in specification learning is explained, how does the system learns?

How the enterprise value and risk is quantified?

Please provide clear examples (at least 3) how these activities are performed and clearly point out where in specification these limitations are addressed. Examples will help examiner to better understand the applicant's invention and focus on relevant

search. Applicant's specification does not provide clear examples how the invention is exercised.

***Conclusion***

2. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
